Agenda

01 Market Opportunity

Market size · Growth trends · Key segments

02 Our Solution

Product overview · Key differentiators

03 Traction & Metrics

Revenue growth · Customer pipeline · Unit economics

04 Go-to-Market

Sales strategy · Partnerships

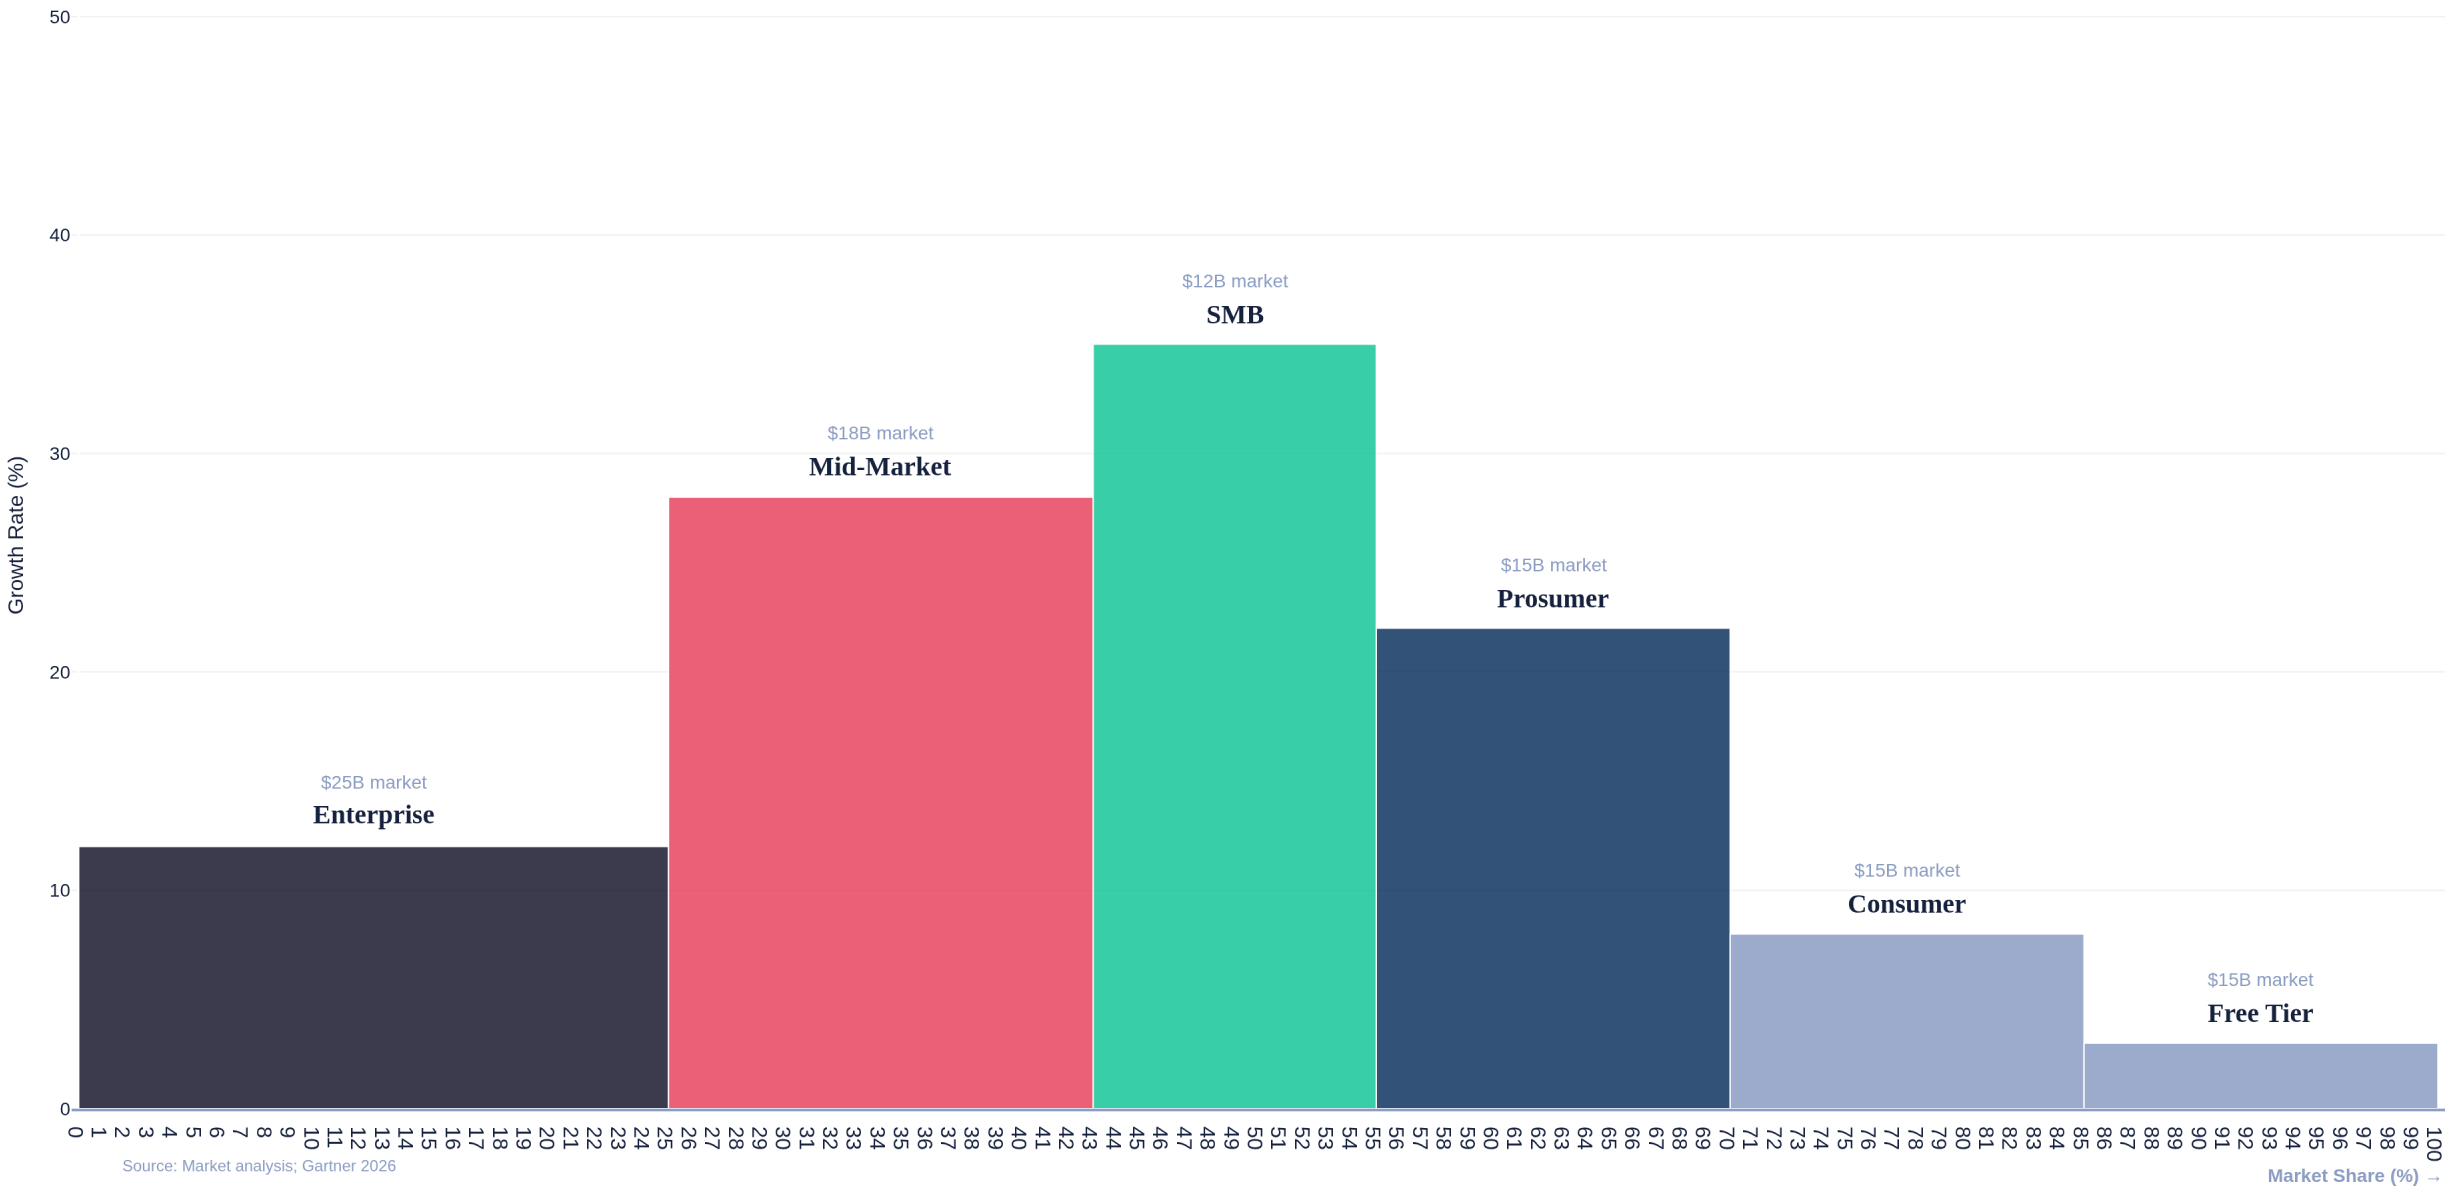
05 Ask & Timeline

Funding ask · Milestones

Engineering dominates Product A spend, while Product B is marketing-heavy

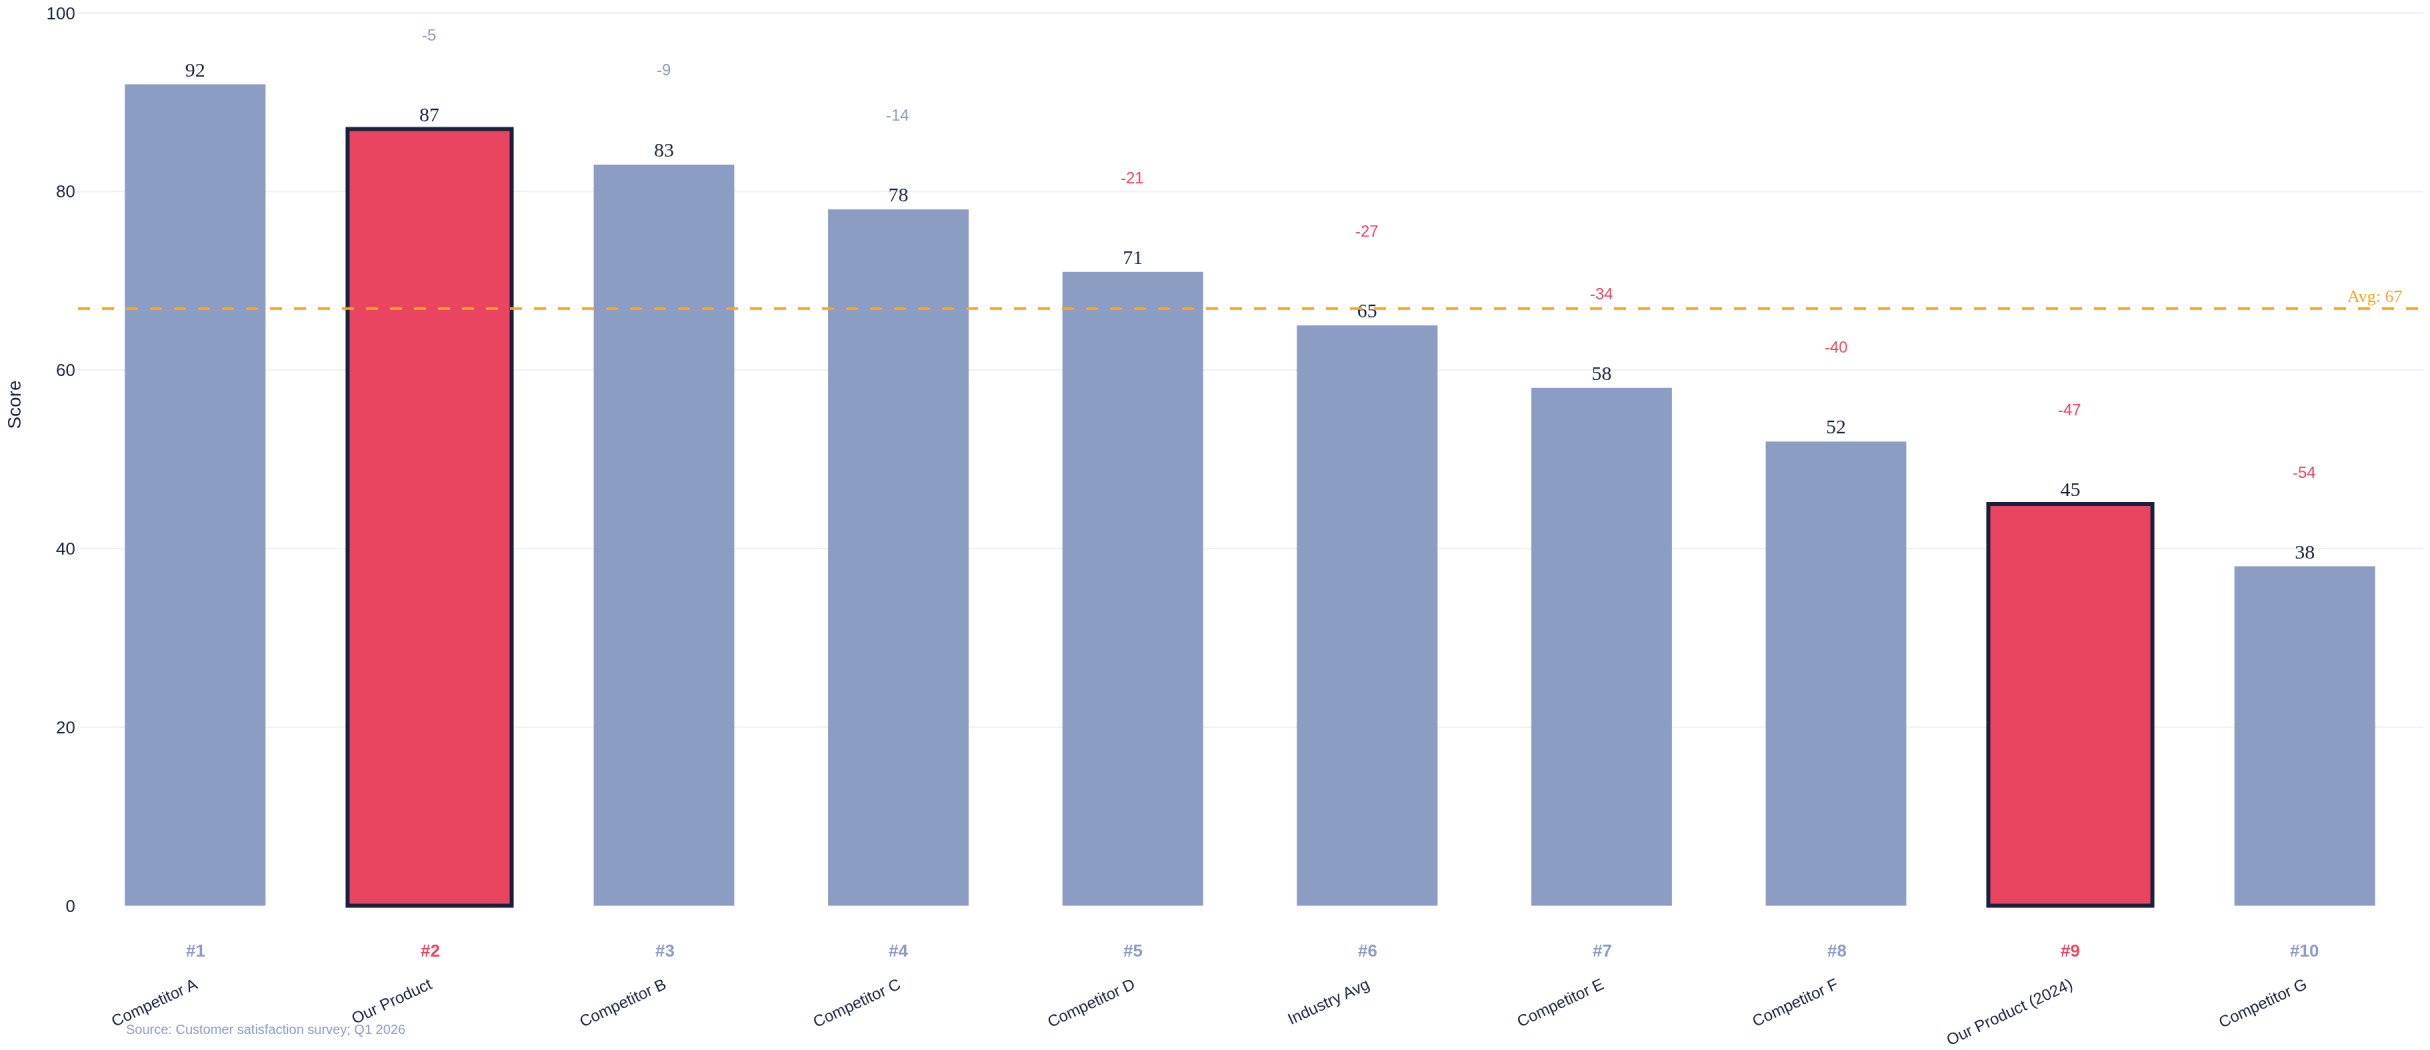
Source: Internal budget data; FY2026 Q1

Mid-market and SMB segments show highest growth despite smaller market size



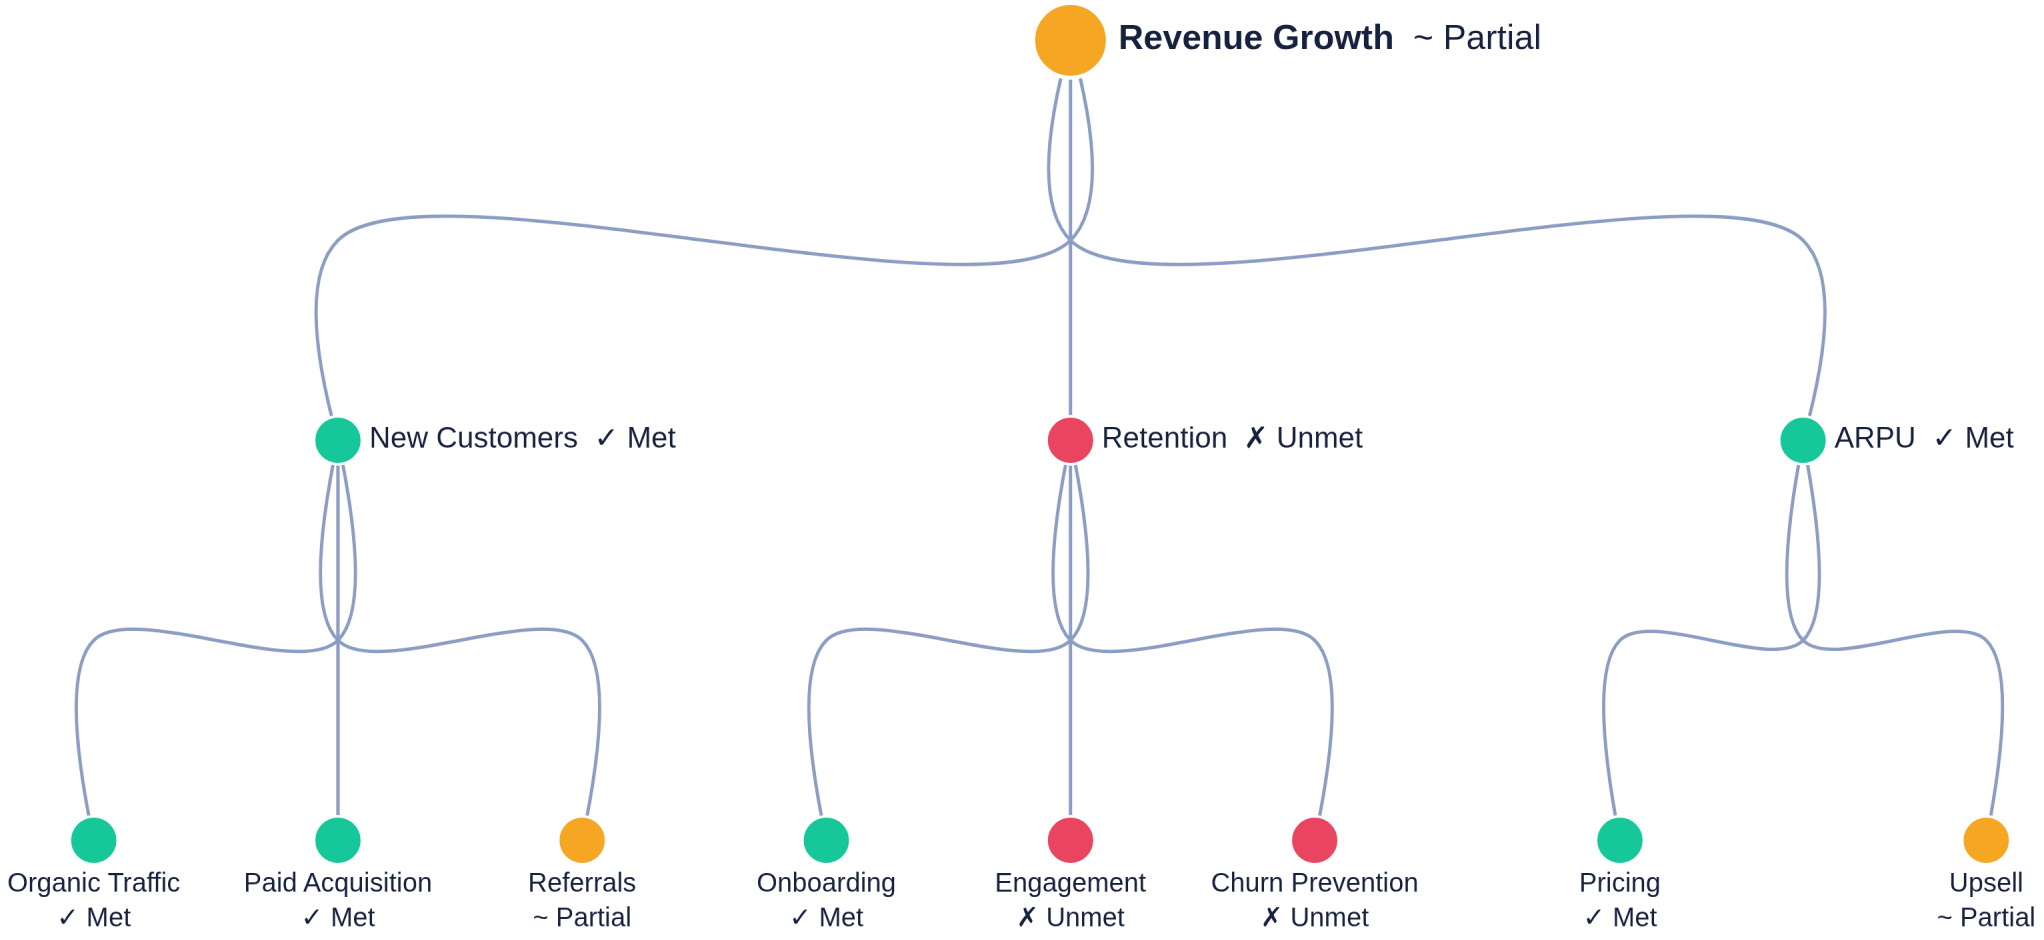
Source: Market analysis; Gartner 2026

Our product ranks #2 overall, up from #9 last year



Source: Customer satisfaction survey; Q1 2026

Revenue growth limited by retention — engagement and churn are key gaps



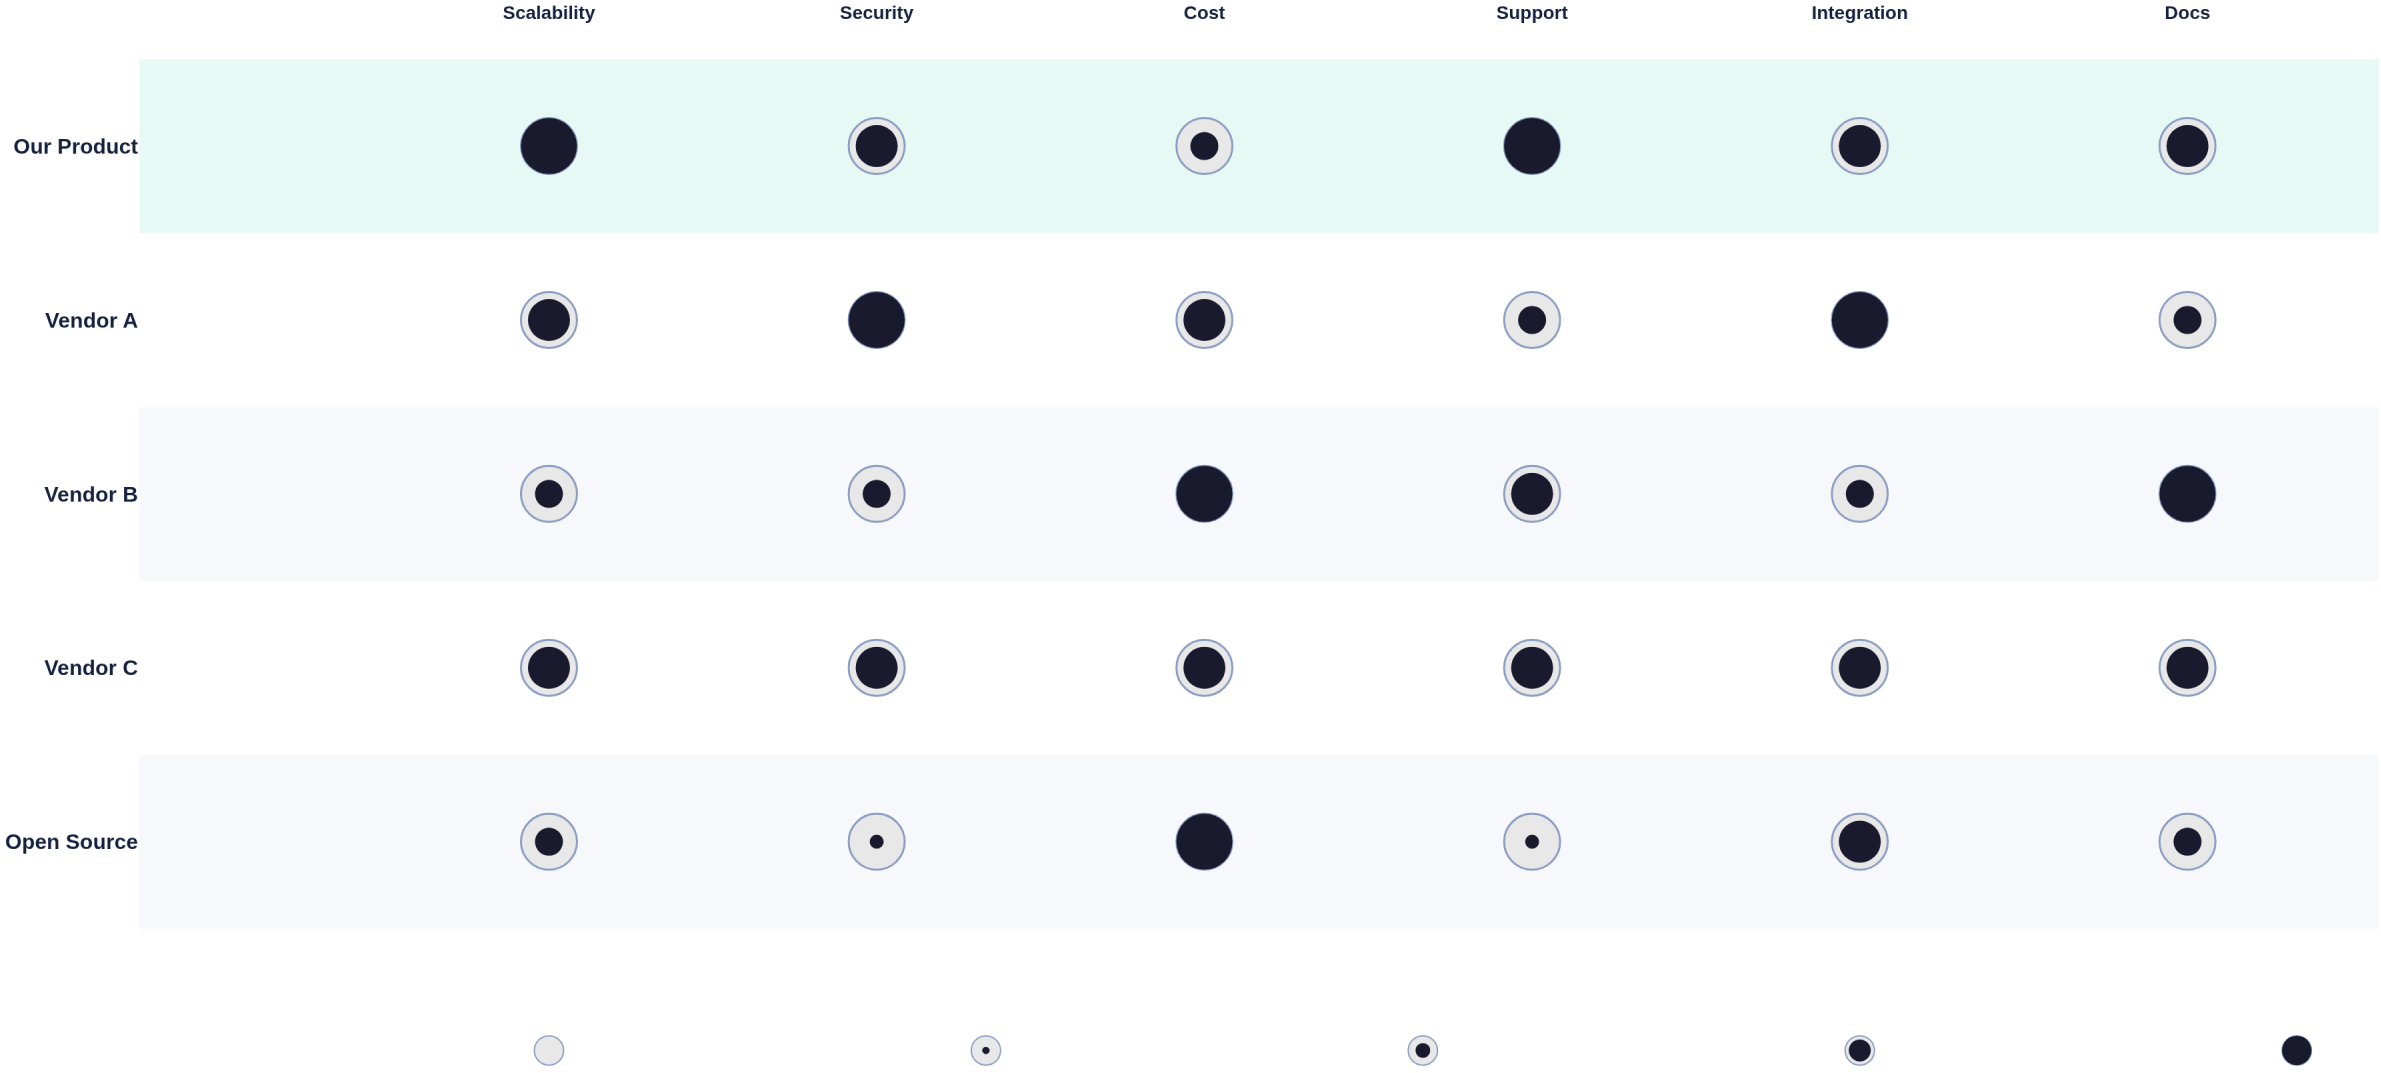
Source: Product analytics; Q1 2026

We lead in UX and security; integration and price are the biggest gaps

Source: Product benchmark analysis; March 2026

Our Product Competitor X

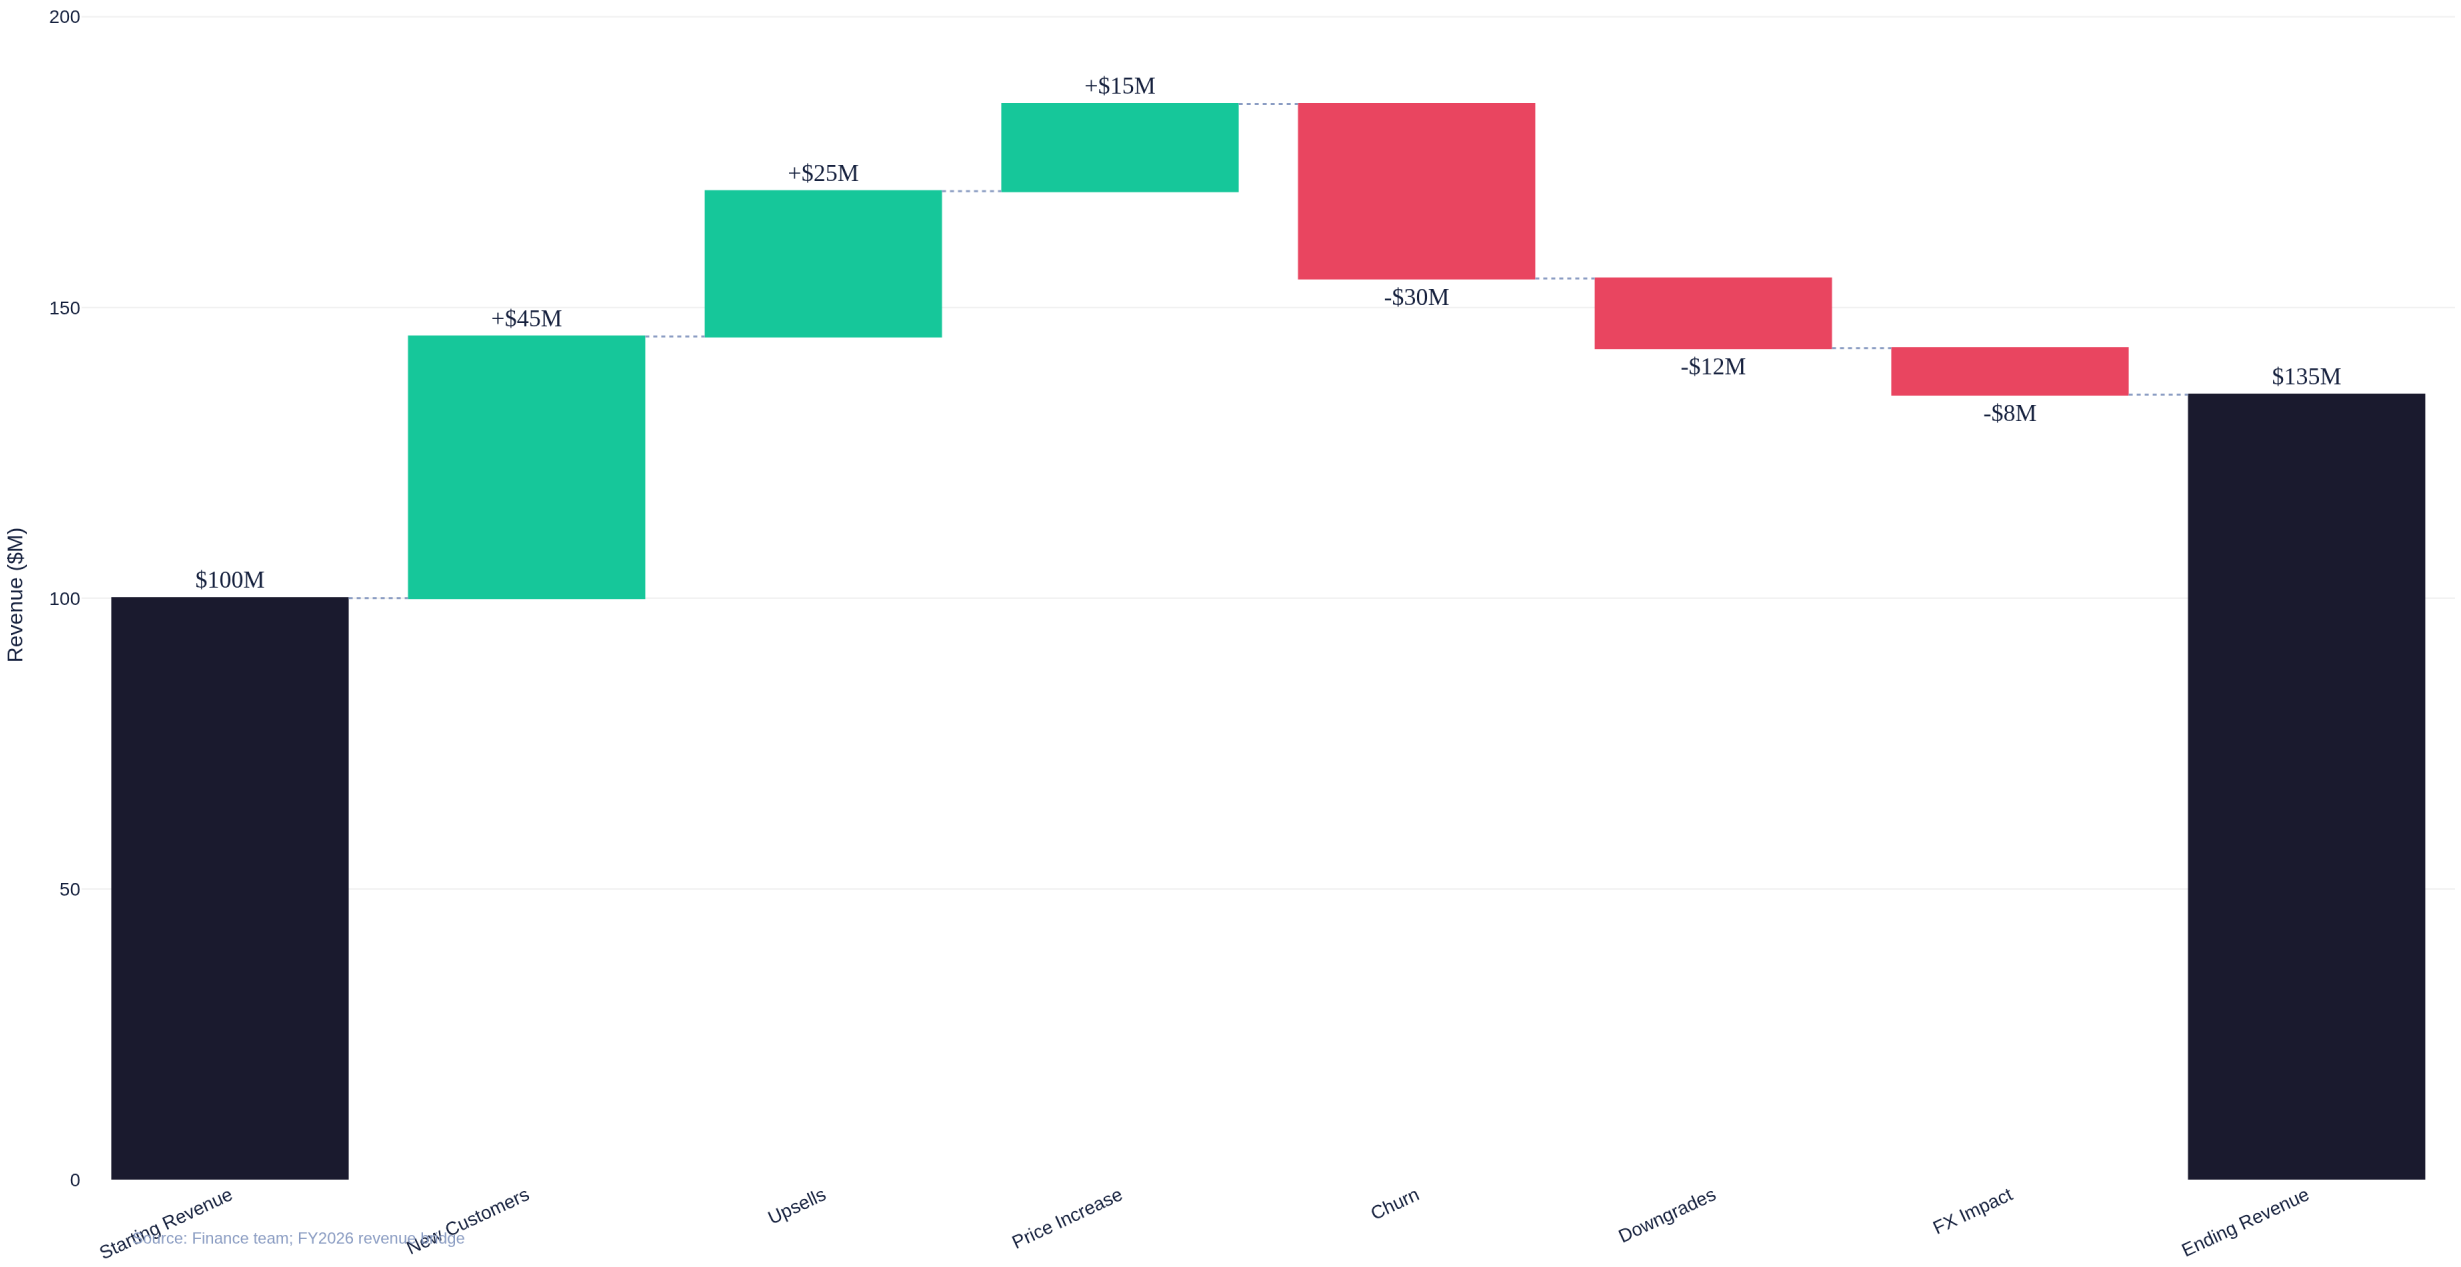
Our product leads in support and scalability; cost is the trade-off



Source: Technology evaluation matrix; Engineering team

AI/ML positioned in the Stars quadrant with highest growth potential

$45M growth, partially offset by$



Source: Finance team; FY2026 revenue bridge

Customer feedback is overwhelmingly positive, with pricing as the main concern

What's working

1. «Reduced our processing time by 60%»

   — CTO, FinTech Co

2. «Best onboarding experience we've seen»

   — VP Product, RetailCo

3. «Finally, an API that just works»

   — Lead Engineer, HealthTech

Areas to improve

1. «Pricing is hard to predict at scale»

   — CFO, Enterprise Client

2. «Documentation could be more detailed»

   — Junior Developer, Agency

3. «Missing some advanced customization options»

   — Architect, Consulting Firm

Strong product-market fit validated; pricing transparency and docs are the main improvement areas
